

Pre-Feasibility Study for Batumi International Airport Extension

Located on the coast of the Black Sea, the city Batumi is becoming one of the most attractive tourist destinations in the region. However, the needed extension of the airport is strongly restricted by its unique geographical location in the territory – the mountains to the east and the Black Sea to the west. Contracted by UAG (United Airports of Georgia), we will assist our clients to conduct a comprehensive pre-feasibility study for the future extension with a horizon of 10 years.

Services

- Collection and definition of basic data
- Analysis of existing and needed capacity for 10-year period for all airport processors
- Determination of operational limitations of the existing airport
- Development of expansion possibilities of the existing airport and recommendations, incl. Relocation need

Period of Services:
2019
