

Centralized Security Checkpoint Terminal 1 Concourse B

The aim of this project is to ensure the future viability of Terminal 1. A northward relocation and centralization of the security checkpoint in Concourse B has been planned, which will enable to establish airside connections between Concourses A, B and C to become an Airside Center for better inhabitation. New efficient smart security layouts have been incorporated in the design.

Services:

- General concept development
- Central security checkpoint design in 3 major options
- Evaluation and recommendation of the preferred option
- Identification of interface projects and its incorporation in the overall programming
- Phasing options, scheduling and cost estimates
- Adaptation of the security area plans involving all terminal levels
- Flow plan development (for passenger, PRM, staff, supply and disposal flows)

Period of Services:
2017 – 2019
