

Terminal 1 Concourse B Re-Configuration Study

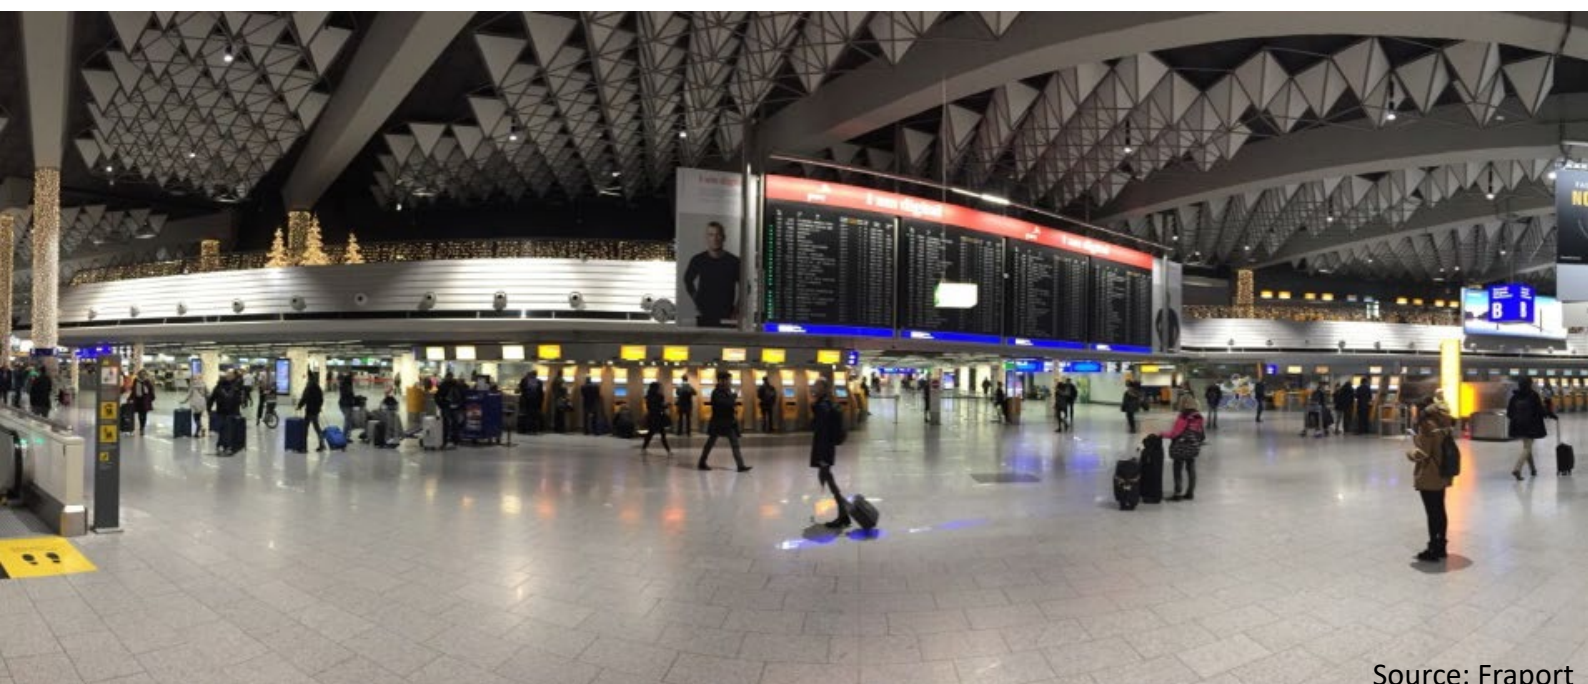

Concept study for re-configuration of Terminal 1 Concourse B with new central security, relocated border control and transfer checkpoints, optimized passenger flows, an enlarged Non-Schengen market place and re-configured airside connection between the Concourses A, B and C.

The scope of this project also included the integration of the existing APM system (automated people mover) between Terminal 1 and 2 with major reconfiguration of various stations.

Contents

- General concept development in several options
- Functional layout planning and passenger flow optimization involving all terminal levels
- Design of relocated checkpoints
- Integration of the APM to adapt transfer flows between terminals
- Planning of a phased development of concourse B

Period of Services:
2017 – 2019
