

Terminal 2 Re-Development

Functional design of the terminal re-development of the existing Terminal 2 for future integration into the Lufthansa/Star Alliance hub at Frankfurt intl. Airport. The project includes a gap analysis and functional terminal planning to meet future requirements of improved hub operations within multiple terminals as well as the optimization of flows, spaces and the passenger experience.

Services

- Gap analysis of existing versus required functions, capacities, spaces and processes
- Development of terminal layout options
- Detailed functional design of all re-development areas
- Illustration of all functional flows (passengers, PRM, e-carts, staff, crews, goods and waste)
- Coordination of stakeholder requirements for terminal operations, non-aviation, security, border controls, etc.
- Development of optimized security checkpoints, border control, check-in and gate areas as well as improved commercial areas and airline lounges

Period of Services:
since 2024
