

## Covid-19 Response Strategy Study (CRSS)

The CRSS is part of the larger Caribbean Regional Air Transport Connectivity Project (CATCOP) which was financed by the World Bank. The study included the assessment and proposal of near- and long-term health screening and protection measures for passengers and staff at Saint Lucia's two airports (Hewanorra Intl. Airport and George F.L. Charles Airport) as well as the development of measures to mitigate the negative financial and organizational impacts of COVID-19 on SLASPA.

### Services

- Global best practices and industry guidance review
- Saint Lucia situational assessment of the two airports
- Development of a health screening / protection action plan incl. near- and long-term measures
- SLASPA financial assessment and outlook incl. development of five-year air traffic forecasts
- Development of a financial resilience strategy and action plan
- Organizational resilience assessment and action plan

Period of Services:  
2022 – 2023
