

## Terminal Capacity Assessment

Tirana International Airport has been experiencing extremely high annual passenger growth figures of more than 10 % over the last 3 years. During peak-hours several functions of the terminal building already today reach their capacity limits and hence terminal expansions are needed within the timeframe of the existing concession agreement.

TH Airport Consulting has been contracted to perform a thorough and independent assessment of the existing and needed terminal capacities and to recommend on the needed expansions.

### Contents

- Evaluation of existing capacities of the terminal departure and arrival areas
- Simulation of peak schedules and future scenarios
- Identification of current and future bottlenecks
- Determination of needed capacities and recommendations for expansion
- Development of functional layouts for terminal extensions

Period of Services:
